Jean/Robyn,

Please try to get the polygon or line layer from the USFS that are shown in the attached jpgs. We have tried to generate the boundaries from the points in the spreadsheet but am noticing some gaps in the data. If we can get these data in a GIS format soon, then we will be able to include them on the new maps we are creating for you.

Thanks,

**John Wieber**

Hi Jean,

This is what Wyman sent to me. The spreadsheet has the corner coordinates. Could you please forward to John and see if he can import the information into GIS?

Thanks!!

Brian

Hi Wyman,

We are working on an investigation related to legacy mine cleanup in the Illinois Gulch area near Breckenridge. I talked to Olivia, and she suggested I ask if you have developed a map of all the claims and corners. Or if you haven't a map, do you have the coordinates so that we could generate a map. We are working with several state and local government entities and private land owners and we are trying to sort out the complex landownership patterns.

Thanks for any help you can give!

Brian
